

## DATASHEET

### A Seal-Software Insight Accelerator

### Actionable Insights. Incredible Savings.

#### SEAL'S INSIGHT ACCELERATORS

- Pre-built collections of richly detailed analytic policies
- Designed to address specific subject matter in a variety of frequent business use cases.
- Easily deployed on the Seal platform
- Provide detailed insight into business, compliance, legal and regulatory challenges
- Generate actionable information for critical topics to accelerate contract analysis, review and remediation efforts

NDA Insight  
dramatically  
increases access  
to meaningful  
information

# NDA Insight™

## 1. The Challenge

Organizations face significant challenges when it comes to effectively and timely analyzing Non-Disclosure Agreements. Although often perceived as “simple” contracts, most corporations must address high volumes of NDA's that are often written on counterparty paper. For that reason, they require time-consuming individual evaluation to ensure compliance with internal corporate requirements. Additionally, corporations often lack a common point of intake or standards for evaluation, resulting in bespoke analysis by business unit attorneys for 6-8 topics of interest. Given that the evaluation of a single NDA can require significant attorney time to review and negotiate, this unnecessary inefficiency creates logjams and slows down business deals.

## 2. The Solution

NDA Insight™ is Seal's comprehensive answer for NDA contract analysis. Combining the Seal platform's powerful AI capabilities with Seal's legal-AI industry expertise delivers an unprecedented level of insight and automation to the review, remediation and negotiation of NDA agreements.

NDA Insight automates the identification and extraction of key contractual provisions across a wide range of topics with a high degree of accuracy, enabling clients to quickly perform more consistent and robust NDA analysis. NDA Insight dramatically increases access to meaningful information—much of which is not addressed in typical manual NDA analysis process—while also decreasing the time and costs associated with the overall process.

## 3. Topics Addressed

NDA Insight is built to correspond to the most common NDA topics. Specifically, Seal has created targeted analytics that are built to extract both basic and complex topics.

## Representative Topics

### CONFIDENTIAL INFORMATION

- Access for Affiliates or Representatives
- Breach by Representatives
- Carve-Outs
- Disclosure Required by Law
- Due Diligence Defense
- Duty of Care
- Duty to Return or Destroy

## Looking for more insight?

Seal insight accelerators are designed and built by legal AI-literate industry experts to address the specific requirements for individual industry and regulatory requirements.

Insight accelerators are available for the following use cases:

- Brexit
- Commercial Credit Agreements
- GDPR - Data Privacy and Security
- Lease Agreements
- M&A
- NDA
- Procurement
- Qualified Financial Contracts

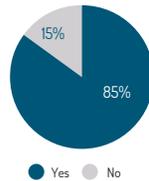

Custom accelerators are available through Seal Professional Services.

## 4. Insights & Answers

NDA Insight does much more than identify whether a topic is generally addressed. It is a detailed set of analytics designed to dovetail with specific NDA topics. For example, NDA Insight doesn't simply answer the question: "Is Treatment of Confidential Information addressed?" NDA Insight asks and answers detailed additional questions such as:

- Does the agreement address the duty to destroy confidential information?
- Does the agreement address the same level of care as one's own data regarding duty of care?
- Does the agreement address reasonable efforts regarding duty of care?
- Does the agreement address technology remnants as an exception to the duty to return?

### Is Treatment of Confidential Information addressed?

### Treatment of Confidential Information Topics

## 5. Components

- **Comprehensive Analytics Set** – easy to install on the Seal platform, tested in most strenuous environments against tens of thousands of contracts
- **Rule Book** – a user guide to know what to expect from each analytic
- **Playbook** – recommended view with analytics and corresponding answer fields with pick list of answers
- **Topical Updates** – analytic updates to correspond to evolving business and regulatory requirements
